

Community Health Needs Assessment Implementation Planning

1. Expanded Choices for Healthcare Services
 - a. Build a new building
 - b. Feasibility study to develop a plan, particularly focused on specialties
 - c. Identify services needed including urology, sports medicine, gynecology
 - d. Develop partners to support the new building
2. Building Competent Workforce in All Services
 - a. Create apprenticeships, clinicals and scholarships
 - b. Partner with VCC to provide volunteers
 - c. Partner with VCC to design programs
 - d. Leverage civic groups and local government funding to create apprenticeships and scholarship opportunities
3. Community to Thinks of EBCH First
 - a. Develop partnerships for co-advertising
 - b. Directory of local resources in multi-media formats
 - c. Create an in-service to increase employee awareness of services available within the community
 - d. Increase wellness program services such as free flu shot program
4. Increase Access to Behavioral Health Services Close to Home
5. Access to Transportation
6. Access to Preventative Services
